## EMPHASIS OF MATTER

Without affecting our conclusion, we draw attention to the explanatory note provided by Compass Minerals on page 66 relating to the Scope 3 Category 4 Upstream Transportation and Distribution GHG emission factor, which should be read in conjunction with the data presented on page 45.

## OUR ASSURANCE ACTIVITIES

Considering the level of assurance and our assessment of the risk of material misstatement of the Selected Information, a multi-disciplinary team of sustainability and assurance specialists performed a range of procedures that included, but were not restricted to, the following:

- Evaluating the appropriateness of the reporting criteria for the Selected Information;
- Interviewing management representatives responsible for managing the Selected Information;
- Interviewing relevant staff to understand and evaluate the management systems and processes (including internal review and control processes) used for collecting and reporting the Selected Information;
- Reviewing a sample of qualitative and quantitative evidence supporting the Selected Information at a corporate level;
- Performing an analytical review of the full year data submitted by all locations included in the consolidated fiscal 2025 group data for the Selected Information, which included testing the completeness and mathematical accuracy of conversions and calculations, and consolidation in line with the stated reporting boundary;
- Conducting two in-person site visits to Compass Minerals facilities/production sites in Canada to review source data and local reporting systems and controls;
- Evaluating the conversion factors, emission factors and assumptions used; and
- Reviewing the presentation of information relevant to the assurance scope in the Report to ensure consistency with our findings.
